## **ISIS Receives Maincert Section 3 Accreditation from Royal College of Physicians and Surgeons Canada (RCPSC)**

*Web-Based Insulin Simulation Now Approved for Specialist Credit*

**Victoria, B.C., February 24, 2010** — Simation is pleased to announce that ISIS, the Insulin Simulation Instructional System, has received formal approval from the Royal College of Physicians and Surgeons Canada (RCPSC). ISIS is an Accredited Self-Assessment Program (Section 3) as defined by the Maintenance of Certification program of The Royal College of Physicians and Surgeons of Canada, approved by Continuing Professional Development, Schulich School of Medicine & Dentistry, The University of Western Ontario (2 credits per case).

Paul Roberts, Simation's CEO, explained "Now all physicians in Canada can receive professional credit as a result of the accreditation with both the Royal College of Physicians and Surgeons Canada as well as the College of Family Physicians Canada (CFPC)."

ISIS is an educational tool that empowers physicians while improving the care their diabetic patients receive. Learners assess their own abilities while working through various lifelike cases in their own time, at their own pace and are connected with other learners to share their thoughts and experiences.

ISIS brings incredible realism to online training. Through the active learning simulation, physicians are taught how to better manage their diabetic patients. Using ISIS they become better practiced at treating diabetics, ultimately referring fewer patients to specialists. Any medical professional who needs to work with diabetics in their day to day activities is able to access the program.

ISIS is available online through [www.ManageYourInsulin.com](http://www.ManageYourInsulin.com).
